

To Allocate Additional Funds to CULSU

Proposer: George Goodsell

Seconder: Mihai Berbec

This Union Notes:

1. The City University Student Union (CULSU) receives a pre-set budget from City University, allocated to the use of assistance of CULSU societies in the funding of events, and general management.
2. The amount of societies represented by the CULSU between the years 2013-2014 has increased drastically, from approximately 20 in 2013, to almost 75 in 2014.
3. Whilst the number of Societies represented by the Students' Union near-tripled, the funding for the Students' Union has not been elevated sufficiently to compensate for the addition in societies.

This Union Believes:

1. That the SU Societies are an integral part of the Student Experience at City University.
2. That the current resources made available to the Student Union does not adequately support the infrastructure of the Student Union now supports.
3. The increase of societies as seen this year (2014) is indicative of a healthy interest of the student population towards the Extracurricular Activities provided by City
 - a. That the continuation of the current fiscal policy by the university will be damaging to the growth and prosperity that the Student Union is currently experiencing.

The Union Resolves:

- I. To call upon the University to allocate additional resources to the Student Union, in order to supplement its support of the Societies that it represents.
